

Data sharing policy, Peru field course 2018

1. The data is intellectual property of Imma Oliveras, University of Oxford, and has partially been published in:
 - a) Oliveras I., van der Eynde M., Malhi Y., Cahuana N., Menor C., Zamore F., Haugaasen T. (2014) grass allometry and estimation of above-ground biomass in tropical alpine tussock grasslands. *Austral Ecology* 39: 408-415
 - b) Oliveras I., Girardin C., Doughty C., Cahuana N., Arenas C.E., Oliver V., Huarsca-Huasco W., Malhi Y. (2014) Andean grasslands are as productive as tropical cloud forests. *Environmental Research Letters* 9, 115011.
 - c) Oliver V., Oliveras I., Kala, J., Lever, R., Arn Y. (2017) No long-term effect of land-use activities on soil carbon dynamics in tropical montane cloud forests. *Biogeosciences*, in press
2. The data is shared for using for teaching purposes only. Because these data are still actively researched by Imma's team and by the Ecosystems Lab, University of Oxford, it would be much appreciated if any use of this data would be communicated to Imma Oliveras (imma.oliveras@ouce.ox.ac.uk) in terms of the direction and scope of their use.
